

Look at nCircle Vulnerability Scanner storing your LDAP password in html code!! Go nCircle security fail! Got to love vulnerability scanners with security bugs!!!

The screenshot shows the nCircle VnE Manager interface. The top navigation bar includes 'nCircle', 'Current VnE mode: Maintenance', 'Last backup: less than one day old +0 transferred backups', 'Trouble reports: 7', 'Help', 'My Account', 'Log Out', and 'Quicklinks'. The left sidebar contains a tree view with categories: Discover, Analyze, Focus, Respond, and Administer. Under Administer, there are sub-items: System, VnE Manager (with sub-items: General, Upgrade, Automated Export, Email System, SSH Public Keys, Modules, Authentication Server), Software Upgrades, Database, and Certificate Management. The main content area is titled 'VnE Manager > Authentication Server' and contains a configuration form for an 'Authentication Server'. The form has a table-like structure with the following fields:

Enabled: <input checked="" type="radio"/> Yes <input type="radio"/> No	
*Name: [Redacted] e.g. Active Directory	Server Type: Active Directory
*Hostname: [Redacted] e.g. adserver.ncircle.com	Authentication Type: Kerberos
*IP Address: [Redacted] e.g. 10.10.111.33	*Kerberos Realm: [Redacted] e.g. NCIRCLE.COM
*Password: [Redacted] e.g. mypassword	*User: [Redacted] e.g. johnson
*Confirm Password: [Redacted] e.g. mypassword	*LDAP Path: [Redacted] e.g. cn=Users,dc=ncircle,dc=com

At the bottom of the form, there are two buttons: 'Save & Replicate' (highlighted with a mouse cursor) and 'Delete'.
