Corporação Vibora

---=[Interview with Jeremy Brown]=---

Special thanks to Jeremy's Computer Security Blog

Mais uma vez a Viper Corp presenteia os irmaos hackers do Brasil com uma entrevista de peso (Jeremy Brown), ele que e' um dos principais colaboradores de um dos maiores site de seguranca do mundo, o packetstormsecurity. Nesta entrevista com meu parceiro de packetstorm ele nos revela sua historia no hacking, ele que e' fundamental para a cena hacker Americana e Brasileira. Como alguns sombrios ;) sabem tambem sou membro do grupo security experts (Veja algumas "publicacoes pré-historicas" do grupo em http://securityexperts.com.br/tecnicas-de-hacking) e isso significa que traduzirei alguns textos do Jeremy para o portugues para compartilhar com os irmaos hackers do Brasil. Jeremy tem uma longa historia no hacking, tambem e' meu parceiro de milw0rm e possui uma media de 28437 vinte oito mil quatrocentos e trinta e sete visitas em seu blog, isso mesmo, mais do que a populacao da cidade em que vivo duas vezes. Possui no milw0rm cerca de 1836 visualizações em "um de" seus exploits, o paper fuzzing for fun and profit tem 10781 e seus documentos nao param de ser visualizados, eu so' tenho 5 mil em um de meus textos no milw0rm. Ele vem provando que sabe ser ouvido e por isso que estamos entrevistando mais esse ilustre hacker, tao importante quanto Phiber Optik e o meu velho amigo str0ke.

6_Bl4ck9_f0x6: Jeremy how and when your interest in phreaking and hacking started and when you had your first contact with the scene?

Jeremy: I was very young and I always wondered what this "telnet" program was and how I could use it :). When I realized software, hardware, etc could be broken, I started programming and then learned how to build things, which was a little different, but still rewarding. I read and learned every single thing I could, and still wanted to know more. For me, what I love about it is breaking things, building things, and building things to break things :)

6_Bl4ck9_f0x6: How do you think computer security industry and the hacker community have changed since the golden ages of hacking?

Jeremy: Its harder, ask most people who have been around and they'll tell you the same. Hackers and vendors are constantly playing catch up and it certainly keeps things interesting.

6_Bl4ck9_f0x6: And how do you see hacking in 10 or 20 years? Can you predict something Jeremy?

Jeremy: I definatly don't see it going away, but I can't say that it will be the same either.

6_Bl4ck9_f0x6: The hacker scene is reverting back toward to non-disclosure. What do you think about it?

Jeremy: I'm not much into labels, but there are differences between hackers and security researchers. I'm not saying there aren't hybrids either, but there are always going to be 0days, and there are always going to be advisories in some form or fashion.

6_Bl4ck9_f0x6: In your opinion, why the phreak scene had shrunk in the last fifteen years? Aren't technology enthusiasts interested in telephones anymore?

Jeremy: I would think most phreaking is underground now, maybe for this reason alone: they don't like the phone company fixing their exploits :)

6_Bl4ck9_f0x6: How do you feel hacking has the ability to effect upon your personality and everyday life? By the way, what are you up to these days?

2

Jeremy: It takes a lot of time, a lot of education, and a lot of motivation. Most people have jobs and that takes up some of their time as well. I myself have a full time job, I am a part time student, and I still make time for my personal research. Its not easy, but its doable.

6_Bl4ck9_f0x6: Could you share with us a few memorable experiences you had with hacking?

Jeremy: Something that really got me interested when I was around 11 or 12 started at school. I guessed the principals username and it was a passwordless login. The screen turned from friendly blue to console-like black, I had access to the most powerful functions the system could probably provide. "Root", if you will. I felt like I had conquerored the world, and it was just the beginning. Talk about a motivation to start learning more :)

6_Bl4ck9_f0x6: We both know hackers and the media have been enemies for ages. So what is your opinion about journalists?

Jeremy: People who don't know anything about hackers or hacking shouldn't write about them.

6_Bl4ck9_f0x6: Are you a defcon speaker Mr. Brown?

Jeremy: My presentation has been accepted and I plan on speaking this July.

6_Bl4ck9_f0x6: Do you have any kind of relationship with former members of defcon?

Jeremy: Actually this is my first time going, so not yet :)

6_Bl4ck9_f0x6: Do you agree that most countries need computer crime reform in order to differentiate between 'criminal' hacking and 'exploration' hacking?

Jeremy: Definatly, I feel sorry for those in Germany.

6_Bl4ck9_f0x6: This one is off-topic: Many guys go to defcon, are you prepared to arrive in our conference (**H2HC**)?

Jeremy: I would love to go and possibly even speak there, I have a lot of respect for some Brazilian hackers. Would someone like to send me? :)

BSDaemon (Another **defcon** speaker) will see your presentation...:) We have good hackers, sandimas is a contributor of the **Phrack Magazine,** the **Gotfault Security** sent the first paper of the **milw0rm** (2006) and many others Brazilian Hackers are good. Cheat Struck is famous in many countries of America. The **Rede Globo** (www.g1.com.br) announces hacker events like H2HC and many others.

6_Bl4ck9_f0x6: This one isn't a question: You're invited to come to visit A MARAVILHA in Brazil and to know the "KCETERAh" called arrolin3 ehhee she is famous! uhasuhasuhs!!

HAHAHAHHA!!! hAHASH!! **Locked!** hahahahahah!! Your fan!

Jeremy: Awesome! :)

6_Bl4ck9_f0x6: And to finish, what would you say to a young kid interested in becoming a hacker?

Jeremy: Learn the material for the ground up, I promise it will make things easier when you can't stop breaking and building things :)

6_Bl4ck9_f0x6: Adios amigo! Bye and Thank's Jeremy!!!!

Jeremy: Thank you for having me.
